Location: Skopje, Macedonia

Company

IBorn designs and provides software solutions for health insurance, media monitoring and system for delivering services for our customers in Denmark, Germany, Netherlands, Sweden.
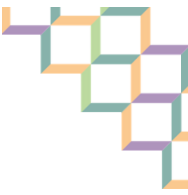

What we do?
- From ideas to fully operational systems, product development is what we take pride in and love doing. Exceptional products have been born on our whiteboard and developed into stable and scalable solutions.
- We have a passion for technology and that, combined with our significant experience leads to a development of great software.
- Our consultancy services are designed to help our clients enhance their IT capabilities by making the right technical decisions and deliver the best business value.
- Using Impact Mapping and Design Thinking we digitally transform our customers.

Job description:

We are looking for people who are passionate and motivated to push the company to the next level. We are very experienced with taking the NEWBORNS (new IBORNs) on board and making them awesome. You will be trained by the best!

We need .NET software developer, seriously devoted on development and eager to learn, who will work on high quality software solutions in different fields: health insurance, media monitoring systems and delivering services. You come up with technical requirements yourself, and also along and in collaboration with the team. You will be part of a team that will design, test, build, deploy and support various solutions for our dear clients.

Requirements:

Who are you?

- Brave when it comes to big responsibilities
- Self-driven and proactive
- Performance driven, consistent and structured
- All in for an amazing challenge
- Eager to learn
- Proficient in English language (or mistaken as native)
- Preferable Bachelor's degree in Computer science and/or similar

Skills:

- Microsoft .NET (4.5 C#, 4.5.1 C#)
- ASP.NET MVC (3, 4, 5)
- ASP.NET Web API (1, 2)
- SQL server, TSQL
- Angular JS
- HTML5
- CSS
- JavaScript
- Entity Framework
- Test Driven Development

Responsibilities:

- Build reliable and scalable web solutions (frontend and backend)
- Use unit tests
- Write clean and reusable code
- Leverage free and open source tools to increase productivity
- You will probably occasionally do:
  - Resolve issues and provide support
  - Deploy new versions
  - Write technical documentation

Why IBorn.net?

- We offer open minded and extremely creative culture.
- Competitive Salary to match your talent
- High quality business line mobile equipment
- Travel to our customers destinations, experience other cultures
- Awesome colleagues and excellent team of engineers
- Freedom to be amazing at your work and grow exponentially
- An energetic cheer to your major milestones
- Fast growing and innovative environment
- Work with well known clients on daily basis.
- Designer and cozy office space, to make your day more pleasant
