

Internships @ Vox Teneo - 2016

Услови за праксата

Праксата е наменета за **македонски студенти** и ќе се одвива на **француски јазик**. Истата треба да започне најдоцна до декември 2016 година. Времетраењето е три месеци, а ќе се одвива во Брисел (Белгија).

- Се бара основно познавање на француски јазик
- Студентот треба да биде запишан на универзитетот Св Кирил и Методиј, Скопје
- Францускиот институт во Скопје му нуди бесплатен модул за **јазична подготовка (30 часа)** на идниот практикант. Часовите ќе се одвиваат во Скопје пред заминувањето на пракса
- **Сместувањето го покрива** Вокс Тенео
- Вокс Тенео и Универзитетската агенција за франкофонија (УАФ) му плаќаат надомест на практикантот во износ од **450 евра месечно**
- УАФ ги **покрива патните трошоци** на релација Скопје-Брисел (повратен билет) и **патничко осигурување**.

Испратете CV и писмо за мотивација (пожелно е истите да бидат на француски јазик) на clemence.lefevres@ifs.mk

Introduction

Firstly, the interns will follow an onboarding program in house, the same program submitted to our regular employees when they start at Vox Teneo. This program includes the learning of our internal tools and methodologies, but also training to acquire a minimum set of skills that the developers should master before going on real projects.

This program usually lasts for more or less 2 weeks. Students will of course have more time to complete it, as we don't expect them to come with a huge technical background.

As soon as possible, we will assign real projects' tasks to the trainees, so they get to work on and deliver production software, within a professional team.

Of course, their work will be supervised by more experienced developers (lead devs).

Expectations

The clear objective of this internship program is that students acquire enough skills and experience, so they could apply for a position at Vox Teneo Macedonia immediately after finishing their studies.

Note: we often hire employees with leftover school obligations, so flexibility is not an issue, we can adapt employees' planning according to such school courses and exams.

Students skills and knowledge requirements

Below are the minimum skills candidates should master.

The candidates will attend a HR interview, and some practical assessments.

General skills

- Analytical and logical skills
- Good English level (spoken / B1)
- Good bases of HTML, js/jQuery, and CSS

NET Developer

- Working knowledge of C#, Visual studio, SQL
- Bases of ASP.NET MVC
- Plus: Web.API, LINQ, Entity framework,...

PHP Developer

- Working knowledge of PHP
- Bases of MySQL
- Plus: Bases of Laravel, WordPress, Drupal, Prestashop

Python Developer

- Working knowledge of Server-side Python coding
- Plus: Bases of Django and straight WSGI
